The Company believes that the medium-term global economic growth outlook will be supportive for emerging markets equities. However, we remain conscious of the multitude of risks around the world: the US-China trade war shows little signs of abating, the monetary policy outlook in the US and Europe increasingly points to a significant slowdown in the world economy going into next year and President Trump continues to throw the book at the post-war economic order.

From a sector perspective, the bulk of the Company's EM exposure is in Financials, followed by Materials and Energy, after taking into account the sector composition of the MSCI EM & Brazilian Index exposure.
